[linkedin.com/in/samuel-burns](https://www.linkedin.com/in/samuel-burns) // github.com/BurnsBlink

SKILLS

Languages & Software: Javascript, Ruby, HTML, SCSS & CSS, React.js (Redux), Rails, PostgreSQL, Foundation, Enzyme, and RSpec
Tools: Github, Git, AWS, Babel, Webpack, and Gemfile

PROJECTS

Flipdog: flipdog.hero.kuapp.com // github.com/BurnsBlink/flipdog

- ❖ A site about dressing your dog up according to a time-rotating theme
- ❖ Mobile first design, featuring a user-centric format and navigation
- ❖ Built using React, React-Router, Rails, Foundation, Fetch, API, and SCSS

9to5 Guys: ninetofiveguys.herokuapp.com // github.com/thestrauss3/five-guys-project

- ❖ Built collaboratively with a team of 4 developers, utilizing pair programming and Git workflow
- ❖ Site allows users to easily find, add, or review burgers
- ❖ Built using a Rails backend, React and Rails front end, Fetch, API, and SCSS features

House of Vikings: house-of-vikings.herokuapp.com // github.com/BurnsBlink/house-of-vikings

- ❖ A site that covers a multitude of topics about Norse/Viking life
- ❖ First project to test understanding of the groundwork of React and applying it to a project
- ❖ Built using React.js and React-Router; uses a Rails back end server

EXPERIENCE

Software Developer, College of Dupage (*Remote*)

Aug 2017 - Nov 2017

- ❖ Collegiate companion site for students taking a biodiversity lab course
- ❖ Allows the user to navigate the “tree of life” to find the study material they need
- ❖ Fully utilizes the front and back end of Ruby on Rails
- ❖ Extensive use of the PostgreSQL database and SCSS
- ❖ Biodiversitylab.herokuapp.com // github.com/BurnsBlink/biodiversity
